BlockEverything - Blockchain for all industries

Executive Summary

We will use blockchain technology, AI, and the metaverse to revolutionize every industry, including healthcare, agriculture, and retail.

Problem

Industries are inefficient and lack transparency. Blockchain solves this.

Market

The combined global blockchain, AI, and metaverse markets will exceed 3 trillion USD by 2030, according to various reports. We will capture our share.

Business Model

We will issue a token that customers need to use our platform. Token value will rise as adoption grows. Revenue model to be finalized.

Financials & Funding Ask

Raising 2M USD. Use of funds: 40 percent marketing, 30 percent conferences and travel, 20 percent office, 10 percent development.

Team

Two founders with marketing backgrounds. Development will be outsourced.

Risks

Regulation may change but we believe blockchain is the future.
