ConnectAll - The social network for everyone

Executive Summary

ConnectAll is a new social network that will connect people from all over the world. It will be better than Facebook because it is more fun and friendlier.

Problem

People want to connect with others and share their lives. Existing social networks have problems like ads and privacy issues.

Market

There are 5 billion internet users. If we get just 1 percent, that is 50 million users, and we will be worth billions.

Business Model

We will make money from advertising once we have enough users. We may also add premium features later.

Financials & Funding Ask

We need 5 million USD to build the app and market it. We expect to be profitable in year 2. Detailed numbers will be prepared later.

Team

Founder is a college student with a great idea. We will hire developers once funded.

Risks

None, because our idea is unique and people will love it.
