Data: Current

Data of last full update: *January 9, 2026*; Country risk premiums last updates: *January 5, 2026*

The data, with a couple of exceptions, gets updated once a year, at the start of the year (some time in the first two weeks of each year). In computing the statistics, the data used will reflect the most updated numbers I can find for each company, which at the start of each year, will reflect trailing 12-month data through the third quarter of the prior year. While most of the statistics are ratios or percentages, if there are absolute values, they are in millions of US dollars.

Browser warning: Starting in August 2021, Google Chrome seems to be having trouble downloading files (spreadsheets, data etc.) from my site. I have no idea why, and have little interest in investing more time finding out. If you have download problems, please try a different browser.

Topic	Current data set as html (just US)	Regional datasets (downloadable Excel)	Description	Explanatory Webcast
Corporate Governance	Insider and Institutional Holdings by Industry Sector	1. US 2. Europe 3. Japan 4. Aus, NZ & Canada 5. All Emerging Mkts 1. Only China 2. Only India 6. Global	Insider holdings and institutional holdings as a percent of outstanding stock, classified by industry.	
Discount Rate Estimation	Historical Returns on Stocks, Bonds, Bills & Real Estate-United States	Download	Historical annual returns on stocks, bonds, bills & real estate for the United States from 1928 to the most recent year. It is a useful starting point for estimating historical equity premiums.
