Contract Understanding Atticus Dataset (CUAD)

510 contracts | 13,000+ labels | 41 clause types | CC BY 4.0

Publication | Dataset | Handbook | Contributors

A dataset of legal contracts with rich expert annotations

Contract Understanding Atticus Dataset (CUAD) v1 is a corpus of 13,000+ labels in 510 commercial legal contracts that have been manually labeled under the supervision of experienced lawyers to identify 41 types of legal clauses that are considered important in contract review in connection with a corporate transaction, including mergers & acquisitions, etc.

CUAD is curated and maintained by The Atticus Project, Inc. to support NLP research and development in legal contract review.
