Browser warning: Starting in August 2021, Google Chrome seems to be having trouble downloading files (spreadsheets, data etc.) from my site. I have no idea why, and have little interest in investing more time finding out. If you have download problems, please try a different browser.

In my early years of data reporting, I did not save the datasets that I created, on the belief that no one would find a use for them. I have learned that some of you do need to go back in time, either because you need to do a valuation set back in an earlier year, or just because you want to compare numbers over time. In the link below, I have archived data sets, though not for all items, nor for all regions. I am afraid that if you don't see a link here, I don't have that archived data. The data is categorized by when the update occurred. Thus, the 1/14 link will take you to the dataset compiled on January 1, 2014. Since I have had to change the raw data source multiple times in the last 15 years, the industry categories may vary over time.
