Summit Yachts - Luxury yacht charters

Executive Summary

Luxury yacht charter company operating from a landlocked mountain town. We will buy three 80-foot yachts and charter them for 15,000 USD per day.

Problem

Wealthy people want exclusive experiences and nothing like this is available in our area.

Market

Our town has many wealthy second-home owners. We have not researched how many would charter a yacht, but we think demand will be strong.

Business Model

Charter at 15,000 USD per day, projected 250 days per year, so 11.25M USD annually from three yachts. Yachts cost 4M USD each, financed by loan.

Financials & Funding Ask

We assume zero maintenance, crew, insurance, or docking costs in year one because the yachts will be new. The nearest navigable water is a 3-hour drive away; we will transport the yachts as needed.

Team

Founder loves boating and has chartered yachts as a customer several times.

Risks

Weather could occasionally affect bookings.
